Universal chisel system for the arthroplasty

Precise. Reliable. Reusable.

RevisioLine - Blade system for the arthroplasty

The blades set has been specially developed for the revision of cementless and cemented stem prostheses.

The set consists of 10 straight, flexible, ground faced blades. The different sizes offer the greatest flexibility in stem revision.

The hardened-stainless-steel-handle with quick coupling function enables the chisel blades to be changed fast and easily without additional tools.
